Experience

LightX Innovations

Oct 2025 – May 2026(6 months Contract)

Software Developer | Full-time contract

Toronto, Canada | Remote

- Built a **Java, Spring Boot** backend for an ophthalmology application, linking clinician-uploaded eye images to patient records in a platform using **FHIR and DICOM** standards.
- Reduced clinical data migration time by **50%** through TypeScript migration pipelines and DICOM processing workflows; used FFmpeg and H.265 encoding for media compression.
- Implemented **tenant isolation** on **Azure Kubernetes Service** with Docker and Helm; provisioned Azure Blob Storage and PostgreSQL infrastructure using **Terraform**.

Canadian Institute for Cybersecurity

Jan 2025 – Apr 2025(4 months Co-op)

Full Stack Security Developer Intern

Fredericton, Canada

- Migrated Flask services to **FastAPI**, integrated APIs with a **Laravel-PHP frontend**, and built **Elasticsearch** indexing and search workflows for a social threat intelligence platform.
- Implemented **Kafka** event streaming between services and achieved **90%+ unit test coverage** using pytest and FastAPI TestClient.

Quber Technologies Inc.

May 2024 – Aug 2024(4 months Co-op)

Software Engineer Intern

Fredericton, Canada

- Built **Java, Spring Boot** financial transaction services with **idempotency** and transaction management, implemented **OAuth2/JWT** authentication and role-based access using Spring Security.
- Reduced transaction API latency by **30%** through **MySQL** query optimization, **Redis** caching, and service-level tuning.

Tata Consultancy Services

Sep 2022 – Dec 2023(1+ years)

Senior Systems Engineer | Client: British Telecom

Hyderabad, India

- Developed features for the **British Telecom portal** using **Java, Spring Boot, and Angular**, connecting frontend workflows to backend services through REST APIs.
- Built **Spring Boot APIs** with request validation, pagination, and **rate limiting** to support integrations across BT portal services.
- Independently resolved **Angular–Spring Boot integration defects**, fixing JSON deserialization, null-field handling, and inconsistent HTTP status codes; added **regression tests**.
- Investigated **production issues** and contributed to technical decisions across distributed teams; reviewed code and mentored junior developers on backend implementation.

Infosys Limited

Jul 2019 – Sep 2022(3+ years)

Systems Engineer | Client: BNSF Railway

Hyderabad, India

- Developed **Java, Spring Boot microservices** and REST APIs to modernize a legacy workforce management platform for BNSF Railway.
- Integrated **DB2-backed mainframe services** with Spring Boot microservices, maintaining **SOAP integrations** while gradually replacing legacy service orchestration components.
- Reduced recurring production incidents by **25%** through automation, monitoring improvements, and **CI/CD** enhancements across Java services and legacy integrations.
- Optimized **MySQL queries and stored procedures** for transactional workflows; built JavaScript and AJAX interfaces connected to backend APIs.

Technical Skills

Java | Python | SQL | JavaScript | TypeScript | Angular | React | Redux Spring Boot | FastAPI | Spring Security | Hibernate | REST APIs | Microservices | OAuth2/JWT | Kafka | MySQL | PostgreSQL | Oracle | Redis | Elasticsearch | AWS | Azure | Docker | Kubernetes | Terraform | CI/CD | GitHub Actions | Azure DevOps | Git | JUnit | Mockito | AI Assisted Development | Agile

Project

AI Serverless Threat Detection

Nov 2024

- Built an anomaly-detection pipeline using **Random Forest and Isolation Forest** with AWS Glue and SageMaker; stored logs in **DynamoDB** and triggered analysis workflows with **AWS Lambda and EventBridge**.

Education

University of New Brunswick, Canada

Jan 2024 – Aug 2025

Master of Computer Science | GPA: 3.8
